* **CO₂-neutral as standard** for all garage doors, operators, entrance doors, residential internal doors, steel frames, steel doors for residential construction as well as storage space systems; **optionally CO₂-neutral** for all industrial doors, operators, loading technology, construction project doors and perimeter protection systems

HÖRMANN

We think green.

Hörmann leads by example: We use green electricity to cover 100% of our electricity requirements at all European production sites. Together with an intelligent and certified energy management system, the use of recycled paper, the saving and upcycling of packaging and the recycling of reusable materials, this saves over 75000 tons of CO₂ each year. Additionally, we offset the remaining unavoidable emissions generated during our production of products for residential construction by supporting renewable energy, forest protection and reforestation projects in cooperation with ClimatePartner.

You can find all information and many videos at www.hormann.co.uk/company/environment

Only from Hörmann

WE ACT GREEN. Our climate protection strategy is based on the annual calculation of the CO₂ balance at our sites, which includes the products manufactured there. And we have been reducing our emissions wherever possible for years. This means we are taking various steps, big and small, to reduce our carbon footprint. We offset the remaining CO₂ emissions through climate protection projects. This makes us the first and only construction component manufacturer to offer CO₂-neutral garage doors, entrance doors and residential internal doors.

As standard

For all garage doors, operators, entrance doors, residential internal doors, steel frames, steel doors for residential construction as well as storage space systems

DIGITAL TOOLS

For specialists, architects and planners

From the e-shop for spare parts and accessories to the quotation and order system iHAAS with configurator to the order portal HAIP with detailed order and delivery information, we offer our sales partners comprehensive digital tools for simple, transparent order processing. The product portal for architects and planners offers texts for invitation to tenders, drawings, BIM data and documents. And we generate more sales for our reference dealers through the Leadtributor with current end customer enquiries.

Some of the products shown are equipped with optional extras and do not always match our standard models. The surface finishes and colours shown are subject to the limitations of the printing process and cannot be regarded as binding. All rights reserved. No part may be reproduced without our prior permission. Subject to changes.
